User Guide

Install IR Control

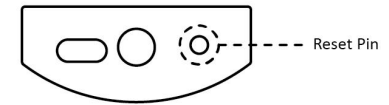

Basic device settings

AP mode

Hold your finger on the reset pin for 3 seconds. The IR Control enters the modem mode then you can start from Do it through the application.

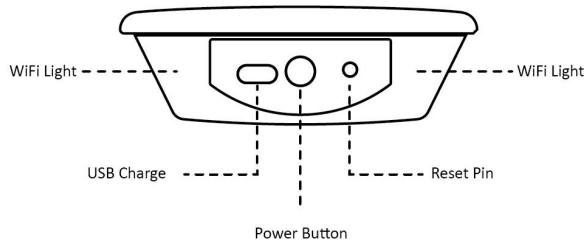

Reset Device

Hold the Reset pin for 7 seconds. The IR Control will restart automatically.

WiFi Light

- Slow flashing mode means the device is running. Trying to connect to the modem.
- Fast flashing mode means AP mode.
- When the Wi-Fi light is off, it means that IR Control is malfunctioning.

Safety Tips

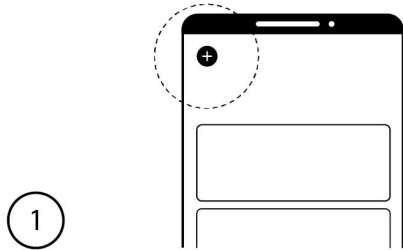

- Before installing, be sure to disconnect the main power fuse.
- Use a phase meter or insulating screwdrivers and safety gloves to connect the IR Control.
- If necessary, be sure to get help from the installer to install the IR Control.
- Do not install the IR Control on worn and inefficient wiring.
- Prior to installation, make sure that the installation site is clean and not damp.

Warning!!

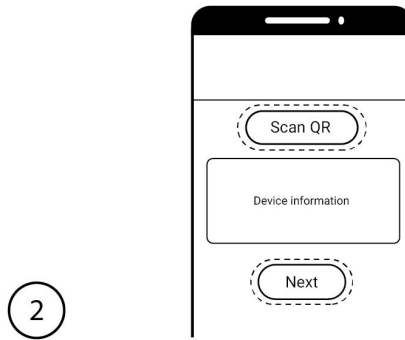

- Avoid connecting the IR Control to high power appliances.
- Do not install the device in humid environments separately.
- Avoid connecting the device to shared or anonymous modems.
- Do not install the switch in spaces with a temperature of more than 45 degrees.
- Change the device password at regular intervals for device security.
- Do not share your username and password with unknown individuals.
